

Healthcare Journey Binder

What is the Purpose of the Healthcare Journey Binder?

The **Healthcare Journey Binder** was created by caregivers and healthcare providers to help improve the overall healthcare experience for people with an illness, disease, or medical condition. It can be used by anyone, including caregivers, to manage important healthcare information by:

- Having a place where documents and information can be kept in one place
- Making it easy to organize and find health information
- Allowing you to easily share any information with the healthcare team
- Helping to give you a sense of control

How Does the Binder Work?

Every healthcare journey is different! The Healthcare Journey Binder contains templates created by Connecting the Dots and other healthcare organizations.

“Make the Healthcare Journey Binder work for you, the person you provide care for and others involved. These needs may change as this healthcare journey progresses. Freely modify the contents as you go to make them work best for you.” - Caregiver

You can modify your binder by:

- Moving the binder sections into an order that you find helpful
- Adding or removing sections and templates
- Storing documents and papers in the binder or envelope provided

The Caregiver Role

A **caregiver** is defined as a **family member, friend and/or neighbour** who provides personal, social, psychological and physical **support, assistance and care**, for family members and friends in need. This support can be provided for any length of time.

Caregiving can include coordinating medical appointments, managing medications, arranging in-home healthcare services, and many other tasks.

“Often, being a caregiver can seem like an overwhelming and all-consuming experience. The Healthcare Journey Binder can become one of your most useful tools and resources, helping you and the person you are providing care for reduce stress and enhance your journey together.” - Caregiver

Safekeeping and Protection of Privacy

The binder will hold personal health information. Be sure to keep it in a safe place and share it only with those with whom you wish to share this information. When disposing of the binder, do so securely. Take the contents to your local hospital or pharmacy to have them confidentially shredded.

A Word of Thanks

Connecting the Dots for Caregivers was a partnership of six health care organizations in Huron Perth, funded by the Change Foundation. Together, with caregivers, they worked to improve the caregiver experience by co-designing solutions, programs and resources that will ensure caregivers feel valued, respected, engaged and supported in their important role.

The **Healthcare Journey Binder** is just one of many resources created through a co-design process involving equal participation of caregivers and healthcare providers. A special thanks to all of those who participated. For additional caregiver resources go to www.caregivershuronperth.ca.

Care Considerations

When planning or providing care, it’s important to understand how to make you and your environment as comfortable as possible. Use this section to write down any ‘triggers’ that might cause you to feel or react in negative way.

Trigger	Reaction	Possible Alternatives
<i>e.g. Loud noises</i>	<i>e.g. Anxiety or agitation</i>	<i>e.g. Keeping the door shut when possible; Turning volume down on in-room alarms</i>

Medications, Therapies & Allergies

About this Section

Why is this Section Important?

It's important to keep an up-to-date record of current medications, vaccines, allergies, and alternative and complimentary therapies that can be easily shared with the healthcare team.

This is important because this record can:

- Decrease medication errors or bad reactions
- Help prevent allergic reactions
- Decrease how often you have to tell people this information
- Help your healthcare team better understand your complete healthcare journey

By recording this information, you will be able to quickly access and share this with members of the healthcare team.

What information do I need to record?

Allergies and Sensitivities

Throughout your healthcare journey, you will often be asked about any allergies you might have. Having a list that can quickly be accessed is an easy way to share this information. Healthcare providers will want to know about any type of reaction you might have had including reactions to medication, food, or the environment (e.g. seasonal allergies).

Medications, Complementary and Alternative Therapies

Having a current medication list that can be quickly shared with your health team can help to reduce medication errors or bad reactions. This record is also helpful to healthcare providers as it provides the most up-to-date record of what medications are being taken and when. It's also important to include lists of vitamins or supplements, complementary and alternative therapies (such as massage or acupuncture), as these therapies are essential to consider in relation to medication and treatment plans.

Vaccines or Immunizations

Immunization or vaccine history is another valuable resource to keep up to date. Healthcare providers will want to know which vaccines are up to date including influenza (the 'flu' shot), pneumonia and shingles vaccines. Keeping an up-to-date immunization record (such as the 'Yellow book') in this section is another option.

About this Section

How to Use this Section

Use and adapt this section to fit your needs. Every healthcare journey is different.

Some examples of ways to use this section include:

- Keep medication records printed from your doctor, pharmacy or from the hospital in this section
- Ensure that you remove older versions of printed medication lists to avoid any confusion
- Review the questions to ask your pharmacist about your medication for examples of questions to ask to better understand your existing medication or learn about a new medication you will be taking
- Remember to dispose of old medical information securely. Ask your pharmacy to dispose of old medication and old medication lists

5 Questions to Ask about your Medications

Did you know?? Medication errors or mistakes are most likely to happen when moving throughout the healthcare system – such as being admitted or discharged from hospital¹.

For this reason, organizations such as the **Institute for Safe Medication Practices in Canada**, **Patients for Patient Safety Canada**, the **Canadian Pharmacists Association**, and the **Canadian Association for Hospital Pharmacists** have worked together to develop 5 questions to help patients and caregivers start a conversation with their healthcare team about their medications².

Use the questions below when talking with any member of your healthcare team about your medications. This includes doctors, nurses, and pharmacists.

1. Changes?

Have any medications been added, stopped or changed, and why?

2. Continue?

What medications do I need to keep taking, and why?

3. Proper Use?

How do I take my medications, and for how long?

4. Monitor?

How will I know if my medication is working, and what side effects do I watch for?

5. Follow-Up?

Do I need any tests and when do I book my next visits?

¹ Institute for Safe Medication Practices Canada. (2011, February 10). *Optimizing medication safety at care transitions – Creating a National Challenge*. Available from: https://www.ismp-canada.org/download/MedRec/MedRec_National_summitreport_Feb_2011_EN.pdf

² Institute for Safe Medication Practices Canada. (2016). *5 questions to ask about your medications when you see your doctor, nurse, or pharmacist*. Available from: <https://www.ismp-canada.org/medrec/5questions.htm>

Allergies and Sensitivities

An **allergy** means your body sees the medicine as harmful. It rejects the drug with an allergic reaction. This can be mild or strong. It can happen within a few hours after you take the drug or not until 2 weeks later. A **sensitivity** or **side effect** is not the same thing as an allergy – it's just your body feeling sensitive to a new medication. Some examples of sensitivities include feeling sick to your stomach, having muscle aches, or not having much energy³.

Alternative or Complimentary Therapies

A **complementary therapy** is something you do or use alongside your conventional medical treatment⁵.

An **alternative therapy** is something you do or use instead of conventional medical treatment¹.

Some examples include: aromatherapy, acupuncture, herbal medicine, massage therapy, visualization, yoga

Medical History, Vital Signs & ADL/IADLs

About this Section

Why is this Section Important?

Medical histories and key dates can be difficult to remember. However, information about your **medical history** including diagnosis, hospitalizations, surgeries and other information are important for your healthcare team to know.

This section is a place where you can document and quickly access your medical history when asked by your healthcare team.

How to Use this Section

Use and adapt this section to fit your needs. Every healthcare journey is different.

Personal Medical History

Some caregivers have said that adding historical information can be a lot of work. With that in mind, in this section you can choose to:

- Add notes about diagnoses, hospitalizations and surgeries starting today and keep the binder up-to-date going forward.
- You can choose to add past procedures to the best of your knowledge. Include dates and other details about past diagnoses and reactions where you can and as you feel it's appropriate

Vital Sign Notes and Tracking Calendar

In this section, we have included an area for you to record your 'vital signs'. **Vital signs** are a basic measure of overall health and can be a source of important information for your healthcare team. Examples of vital signs include blood pressure, heart rate, and weight. **This information lets your healthcare team know what is normal for you!** A record of vital signs is not needed for every person. Speak to your healthcare team to see if such a record would be helpful for you.

Activities of Daily Living and Instrumental Activities of Daily Living

It may also be important for you to record your 'Activities of Daily Living' and 'Instrumental Activities of Daily Living'. **Activities of Daily Living** are the tasks of everyday life. These include bathing, eating, and dressing. **Instrumental Activities of Daily Living** refers to those tasks that are needed to live independently. Keeping a record of these tasks can be helpful for your healthcare team since it lets them know how much help you might need. Depending on the diagnosis or stage of illness you may not need to use this part of the binder.

Personal Health History

Diagnoses		
Year	Name of Diagnosis or Concern	By Who (e.g. physician's name, etc.)?

Activities of Daily Living (ADL)

Last Updated: _____

The term, 'Activities of Daily Living' (ADL) refers to everyday personal activities. Examples include bathing, eating and drinking, and walking¹. Use the chart below to track your ability to complete ADLs. This is important information to share with your healthcare providers to provide and plan care. It should also be updated over time as ADLs may change.

	No Help Needed	Some Help Needed	Complete Help Needed	Not Applicable
Example (Bathing)	<i>e.g. face and arms</i>	<i>e.g. rest of body</i>	<i>e.g. hair washing and back</i>	

	No Help Needed	Some Help Needed	Complete Help Needed	Not Applicable
Bathing or Showering				
Dressing				
Grooming				
Mouth Care				
Toileting				
Transferring Bed/Chair				
Walking				
Climbing Stairs				
Eating and Drinking

Consent & Legal Matters

About this Section

Why is this Section Important?

This section includes information about some of the legal terms that you may hear in your caregiving journey. The section may not include everything you could need, but these were identified by caregivers as information that's often confusing and important to know.

How to Use this Section

In this section you can keep any additional information or legal papers that you collect. There is a more secure envelope at the back of the binder to hold papers as well.

Remember, this binder may contain information that is sensitive, private and valuable. Please keep your binder in a safe place. The information in this binder, once no longer needed, must be securely disposed. Ask about secure disposal at your hospital, doctor's office or pharmacy.

Things you can include in this section: Power of Attorney (POA), Do Not Resuscitate (DNR), custody or separation documents, next-of-kin names and contact information, consent forms and end of life documents.

Consent & Legal Matters

Please use this section as a starting point for conversations with your healthcare providers (and others) about these topics where applicable. **The information in this section is not to be used as advice or legal counselling.** The information in this section is accurate as of October 2018.

What is a Caregiver?

- A **Caregiver** is a family member, friend, or neighbour who provides personal, social, psychological and physical support, assistance and care for a family member or friend in need. This role can be for any length of time.

What is a Substitute Decision Maker?

The Substitute Decisions Act

- The Substitute Decisions Act (SDA) is the law that governs who can make decisions about their
 - i) personal care and ii) personal property when that person is not mentally able to make certain kinds of decisions. The Act covers financial and property management decisions, and decisions about personal care, which include health care, food, housing, safety, as well as end-of-life decisions.¹
- A person who makes decisions for another person is called a **Substitute Decision Maker**. This person is someone who is given the legal authorization to make personal care decisions on behalf of that person. The need to take such a step could be caused by illness, accident or disability, a temporary condition or a permanent one.¹
- In Ontario everyone automatically has a **Substitute Decision Maker**. Under the act, healthcare providers obtain consent from the person highest on the following list:
 1. Guardian of person with authority for treatment
 2. Attorney named as a Power of Attorney for Personal Care
 3. Representative appointed by the Consent and Capacity Board
 4. Spouse or Partner
 5. Child, Parent or Children's Aid Society
 6. Parent with right of access only
 7. Brother or Sister
 8. Any other relative by blood marriage or adoption
 9. Office of the Public Guardian and Trustee¹

¹ Ministry of the Attorney General, The Office of the Public Guardian and Trustee (2000). A Guide to the Substitute Decisions Act. Ontario: Queen's Printing for Ontario. Available from: <https://www.attorneygeneral.jus.gov.on.ca/english/family/pgt/pgtsda.pdf>

Consent & Legal Matters

What is a Power of Attorney (POA)?

- A **Power of Attorney** is a legal document that sets out who will be given the right to act on your behalf when you are unable to do so.²

Are there different kinds of Power of Attorney?

- Yes. In Ontario there are two kinds of **Power of Attorney**:
 - i. **A Power of Attorney for Property (CPOA)** covers a person's financial affairs and allows the attorney to act for you even if you become mentally incapable.² The CPOA can be one of two types: "continuing" (goes into effect as soon as signed); or it will specify that it takes effect only upon a finding of incapacity.
 - ii. **A Power of Attorney for Personal Care (POAPC)** covers a person's personal decisions, such as housing and health care.²

How are a patient's wishes captured?

- Patients should consider discussing with loved ones and documenting, such as in a **Power of Attorney for Personal Care (POAPC)**, what they would like to happen if they become ill and cannot communicate their wishes about treatment. In Ontario, a POAPC must be written according to specific rules, e.g., it must be witnessed by two people, and it names the 'attorney' who will interpret the patient's wishes.

What is a Do Not Resuscitate - DNR?

Do Not Resuscitate means that the healthcare provider (in accordance with his/her level of certification) will not initiate any of the interventions listed in the definition of CPR, below.³

Cardiopulmonary Resuscitation (CPR) An immediate application of life-saving measures to a person who has suffered sudden respiratory or cardiorespiratory arrest. This includes some or all of the following procedures:

- Chest compression
- Defibrillation and/or pacing (application of electrical current to stimulate/regulate heart function)
- Artificial ventilation (e.g. mouth-mouth or assisted ventilation with compression bag)
- Insertion of an artificial airway (to provide significant pathway of oxygen to lungs)
- Resuscitation medications that target cardiac function³

² Ministry of the Attorney General. (2017). *How Powers of Attorney work*. Available from: <https://www.attorneygeneral.jus.gov.on.ca/english/family/pgt/incapacity/poa.php>

³ Basic Life Support Patient Care Standards – Version 3.1. (2018). [Downloadable Document]. *Emergency Health Regulatory and Accountability Branch Ministry of Health and Long-Term Care*. Retrieved from http://www.health.gov.on.ca/en/pro/programs/emergency_health/docs/basic_life_support_patient_care_standards_v3_1_en.pdf

Consent & Legal Matters

**** Speak to your Doctor or Nurse Practitioner about DNR to find out more information that can support your decision about this order.**

DNR Confirmation form (DNRC) – *used by firefighters and paramedics only⁴

- This form confirms that the existing care plan does not include CPR
- This is a standardized form in Ontario for first responders to follow (paramedics, firefighters)
- This form is valid when signed by a doctor or nurse. Paramedics and firefighters are not required to review or confirm the actual **DNR** order in the patient/client's health record.
- Form can be used as many times as necessary
- This form is different from the hospital's **DNR** as it is stating whether or not to initiate CPR – hospitals have different levels of care. Once at hospital the physician will further clarify the level of care. This form was created for first responders to have a clear direction on whether or not to initiate CPR.
- The patient or substitute decision maker can rescind **DNR Confirmation Form** at any time.
- Speak to your healthcare provider for more information about filling out a **DNR Confirmation Form**⁴

Personal Health Information Protection Act (PHIPA)

The **Personal Health Information Protection Act** is federal legislation that addresses issues around the collection, use and disclosure of personal health information⁵

Healthcare Team & Notes

About this Section

Why is this Section Important?

Keeping track of everyone on your **Healthcare Team**, can sometimes be overwhelming. Having all of the information in one place can reduce the time and frustration spent looking for ways to contact providers in times of need.

It's hard to remember everything after discharge and even during admission. This section serves as a place to keep all information received during the hospital stay using notes and communication logs.

This section provides a clear way to keep track of details about appointments, tests and procedures and community provider visits so that a caregiver/family member can make arrangements to accompany you, provide transportation and support. Details about scheduled appointments, as well as previous information and notes can be valuable when planning appointments and/or tests.

In the days leading up to healthcare appointments, you often think of questions that you may want to ask. More often than not, these are forgotten when the appointment starts, unless they are written down in advance. There is an area to keep track of questions for each appointment. You are an advocate for yourself and/or the person you're caring for. These tools can help you in that role.

How to Use this Section

Use and adapt this section to fit your needs. Every healthcare journey is different.

My Community Care Team

This template provides a reference resource to keep track of your community care providers. In each of the bubbles you can include contact information for each person or organization. This can also give you an idea of what community resources are available and allow you to discuss with your providers about the potential role that they may have in you or your care recipient's health care.

Healthcare Appointments

Fill out the sections under healthcare appointments to keep information about upcoming and past appointments.

About this Section

Questions to Ask Healthcare Providers

Caregivers can be advocates for the person they care for. Here are four questions to consider asking when you interact with healthcare providers:

1. What is the main concern today?
2. What needs to be done next?
3. Why is it important to do this?
4. Who can I contact if I have questions

Tests and Procedures

Fill out the sections under tests and procedures to keep information about tests and procedures. Recording notes – how it was tolerated, issues with preparation or recovery, etc. – can help when you schedule or plan future tests and procedures.

Use the pocket provided in this section to place things like parking receipts and upcoming appointment cards until you can log them along with any information received from health care providers.

Notes

Notes pages are included in this section for you to record information as you need to. You could use them during a hospital stay or any other interaction with healthcare providers.

Communication Log

Make use of the communication log during your hospital stay and hospital bedside white board to keep track of questions you have for healthcare professionals. White boards are handy because questions can be left here for answers to be obtained even when you are not present.

Community Provider Visits

This template can be used to keep track of community visits. This can be helpful for future reference of visit dates, but there is also a space for notes that can be helpful during future visits.

Messages I Have for Community Providers

In the days leading up to your next community visit you often think of questions that you may want to ask. More often than not, these are forgotten when the appointment gets going, unless they are written down in advance. This section also provides an area to keep track of questions for community providers.

My Community Care Team Role Descriptions

Care Coordinator or Case Managers are responsible for assessing, planning, coordinating, implementing and reviewing patients' needs and services. They provide information to patients as well as referring them to alternate community resources. They may work for the Local Health Integration Network or another community agency.

Respite provides temporary relief for caregivers to leave for activities or rest. It can include overnight care using respite services outside the home.

Personal Support Workers assist caregivers in-home with daily living that can include bathing, toileting, dressing and feeding.

Family Physician is the physician you see on a regular basis for check-ups, they diagnose and treat illness, prescribe medications and give referrals.

Nutritional Services deliver food and prepared meals to caregiver homes to ensure a healthy diet and easier preparation.

In-Home Nursing offers accredited nurses to help with care planning, medications, wound care and other procedures to help a person with illness or injury.

Nurse Practitioners can diagnose and treat illness, order and interpret tests, prescribe medication, preventative care and perform procedures.

Mobility Services offer safe, accessible and affordable transportation. Services may include volunteer drivers or accessible vehicles.

Occupational Therapists help overcome the physical limitations that interfere with someone's ability to do daily tasks that are important to them.

Physiotherapists treat disease, injury or impairment using exercise, massage and other physical interventions to improve mobility, strength and reduce discomfort.

Speech/Language Pathologists help assess, diagnose, treat and prevent speech and swallowing disorders.

Case Workers help to administer access to different services and supports

Adult Day Programs offer supervised programming in a group setting and include assistance with personal care.

Social Workers help caregivers and their families access services to improve their quality of life and be supported at home or in the community.

Huron Perth Healthcare Alliance Healthcare Team

If you are a patient or caregiver at any of the **four** hospitals within **the Huron Perth Healthcare Alliance (HPHA)** (**Stratford General Hospital, Seaforth Community Hospital, Clinton Public Hospital, and St. Marys Memorial Hospital**) you may notice that staff wear different coloured uniforms. To help you recognize the different roles of the hospital team, please refer to the chart below.

****It is important to note, if you are a patient or caregiver at any hospital outside of the HPHA, staff may have a different uniform policy.**

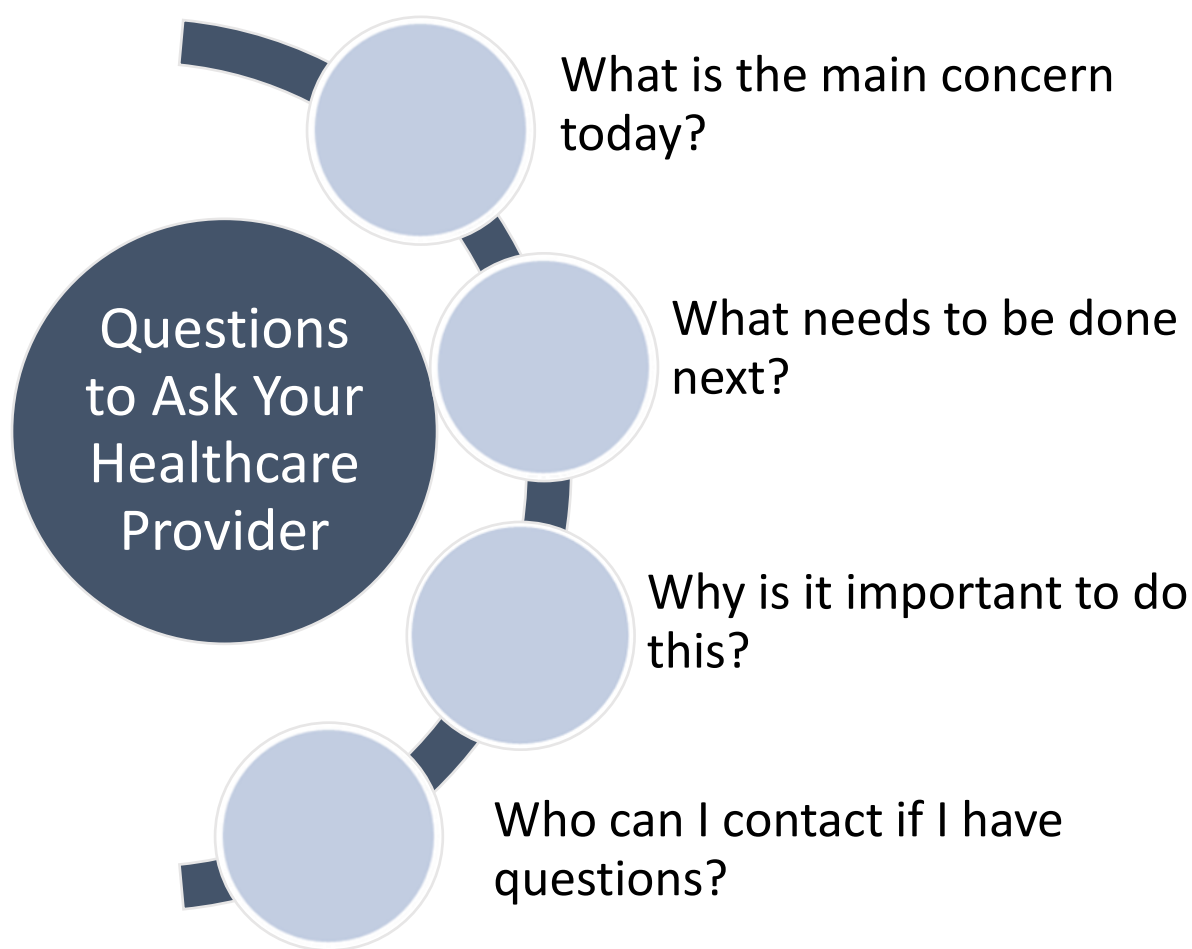

Staff/Department	Colour	
Dialysis Assistant		Teal
Personal Support Worker		
Dietitian		Black Blouses
Nutrition and Food Services Supervisor		
Diagnostic Imaging		Black
Environmental Services (Housekeeping)		Grey
Laboratory Technologists/Assistants		Caribbean Blue

Care Templates

About this Section

Why is this Section Important?

Organization will lighten your load! This section is filled with some tools, templates, and resources that can be used to support you in organizing and managing your day-to-day routine and activities.

How to Use this Section

Use and adapt this section to fit your needs. Every healthcare journey is different.

How Friends and Family Can Help

This template provides a resource to use when looking for support. People may offer to help out, but do not know how they can contribute. Keeping a list of duties that you may need support for can serve as a great quick reference resource. Consider letting others have a role to help you complete some of the tasks that you have on your list. Many hands make light work!

Meal Planning Chart

Meal planning is an easy way to save on time. Meal planning has additional benefits including saving money, eating better, and less trips to the grocery store and time cooking. If you or someone you are caring for needs help at meals, this can be a good place to write who and when help is needed.

Daily Routines

This template has been created to record your daily routines. This may be helpful if you have a complicated schedule, or if you require care from multiple people. If you have a caregiver or health providers coming into your home, recording your plan serves as a back-up if you become unavailable to provide care – others can look at the schedule help out as needed.

Body Diagram

The body diagram template can be used to track pain, sensation, strength or anything else that is relevant to you or the person you are caring for.

Typical Week

This is a template for recording your daily routine. This can be helpful as healthcare providers are coming and going to help share with them the tasks that need to be done each day.

About this Section

Household Routines and Preferences

This template is used to record routines and preferences. For example, do you prefer the temperature of the house is kept a certain way? The blinds are drawn at a particular time? Do you have food preparation preferences (e.g. food should not touch)? These tips about preferences can make the difference in quality of care for you or the person you are caring for and can be shared with anyone who comes into the home.

Calendar Templates

Keeping a calendar is essential to staying organized. This can help you know where you need to go each day and when. Keeping on top of this information can relieve stress, help you prepare for appointments, and avoid double booking. Having a calendar also helps to recognize in advance which days they might need extra support. Use the blank templates, or your own calendar, to keep track of appointments, procedures, hospitalizations, meetings etc. The calendar can be used in any way that suits you.

The templates included in this section are just the start of potential templates that you may find or create to help you on your journey. Feel free to add, modify or replace any contents of this binder with resources that suit your journey.
